Approved!

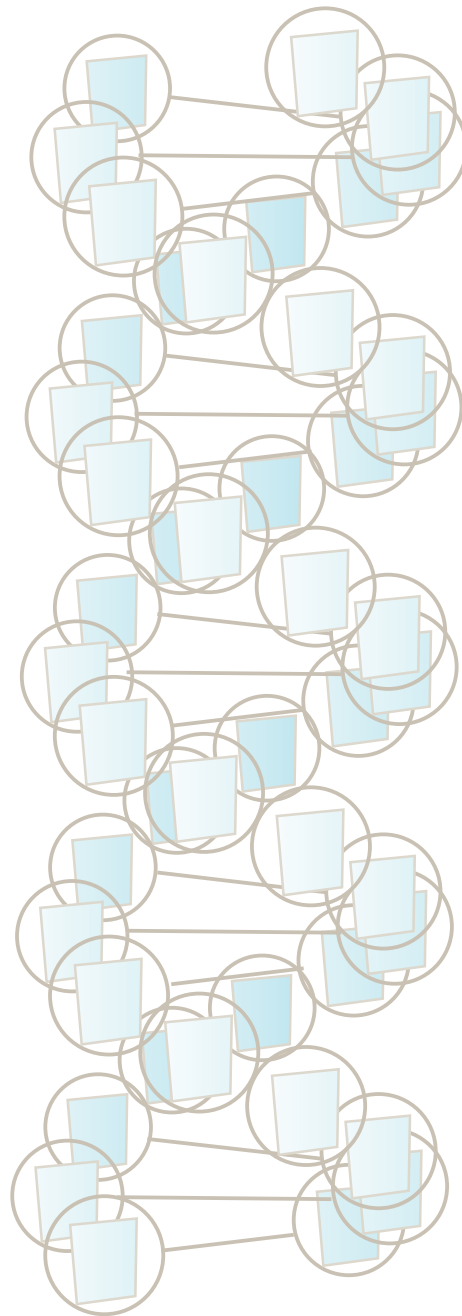

# EFFICIENCY > SIMPLICITY > PRODUCTIVITY

*Collaborative tool • Distant proofing and approval • Real time information*

WebPage let your customers access your production workflow and manage their folder, from upload to final delivery, wherever they are.

***Everything is controlled through a simple and easy Web interface:***

- No soft to install for your customer
- No plug-ins to install in their web browser
- Intuitive interface
- Windows or Mac
- Compatible with TrueFlow, ArtQuest, and soon Prinergy and Apogee
- Compatible with certification tools like Pitstop and OneVision
- Customisable interface.

## MANAGING THE PAGES

Collaborative followup lets users manage their jobs, monitor last minute corrections. Automatic email send warning to any changes.

A story board let you see in a wink all the pages in a job as their status, wether they are approved, rejected or asked for correction. The story board can be put in continuous mode or in sections depending on the needs.

A booklet preview shows you the job as it is finished. Simply turn the pages to check the folios's order.

The zoom gives you the opportunity to check the pages with high accuracy.

## PAGES APPROVAL

Just select and click to approve or reject a page or add your comments or corrections. Manage versions of the pages, upload the revised pages. Story board is automatically updated. Finally approve the job.

## DELIVERY FOR PRINT

WebPage will take charge of delivery for the print and keep the informations about your suppliers (local folder, FTP server, emails).

Sending a job is easy as clicking.
